TACK ROOM®

EXTRA LIGHT ALUMINUM SADDLE BOXES

The TACK ROOM has been created to provide all horse enthusiasts with the highest quality products developed using the knowledge, technical expertise and modern equipment of ESjOT - a leader in steel and aluminum processing on the European market.

We provide saddle boxes highly regarded by riders in various equestrian disciplines such as: jumping, dressage and eventing, as well as horse owners. There are thousands of satisfied users who enjoy our bespoke equipment every day. It is modern design, advanced technologies, the highest functionality, attention to detail and, above all, extensive personalization, that make our products unique.

At TACK ROOM, we do not just manufacture saddle boxes. We design saddles boxes FOR YOU, to meet all your expectations, both in terms of their functionality and aesthetics. There are no orders too difficult or clients too demanding for us. The final customer satisfaction is crucial at every stage of the design and production processes.

LED lighting inside the box

synthetic material mirror in elegant, leather frame

2-3 detachable and adjustable saddle racks (invisible stainless steel reinforcement)

Desk, marker and phone holder

PERSONALIZE YOUR TACK BOX YOURSELF!

Go to tackroom.pl / PERSONALIZATION /

All saddle boxes are made of aluminum, which makes them light and corrosion resistant. Individual design is achieved by high-quality powder coating with durable polyester paints. The color chart can be modified at the customer's request to obtain the desired effect and a consistent image with branding.

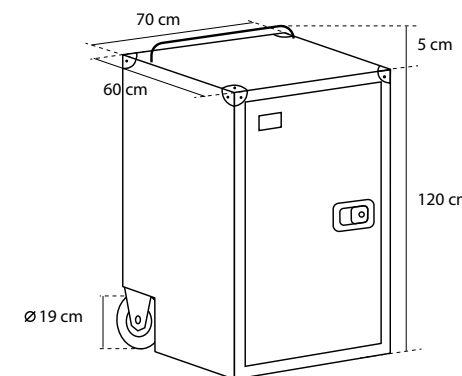

We have developed the TACK ROOM aluminum saddle boxes configurator that allows you to give them unique and personal features thanks to the possibility of adding a color, name and surname, initials, club colors, sponsor's brand logo or a photo, according to your idea. Individual features may also be applied to the interior of the saddle box, as well as its individual elements - drawers, hangers, fittings, mirror frames and corners.

If your project requires custom graphic design, contact us via janowska@tackroom.pl

TACK ROOM COMPACT & COMPACT EVO

The COMPACT Saddle Box is ideal for children and competitors who have one or two horses. Capacious and light, it is equipped with a deep drawer for the rider's necessary equipment: helmet, shoes, detersives. The space for saddles is very wide, which allows comfortable packing and unpacking of the box. There are two retractable and detachable hangers on both sides of the box.

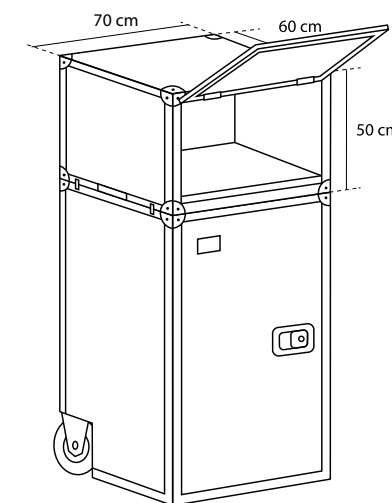

EXTENTION DIMENSIONS:

Total height: 50 cm
Width: 70 cm
Depth: 60 cm

BOX DIMENSIONS:

Total height: 125 cm
(box: 120cm, handle: 5 cm)
Height without handle: 120 cm
Width: 70 cm
Depth: 60 cm
Drawer's height: 25 cm
Wheels' diameter: 19 cm

fully pull-out and detachable
drawer (self-closing mechanism)

two pull-out and detachable
bridle racks

stainless steel handle

practical net on the door for handy
accessories

hooks for quick assembly
and disassembly of extension
(no tools required)

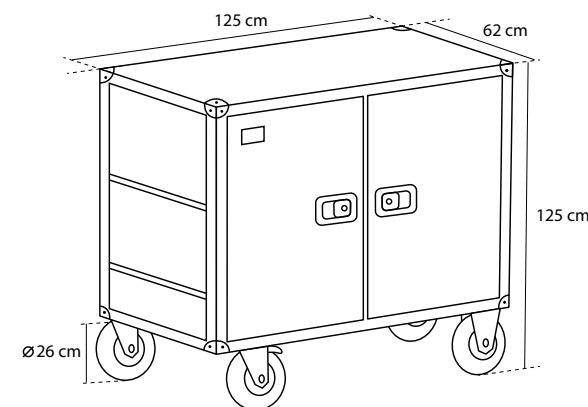

hinges allowing any position of the
flap (opening angle 180 degrees)

TACK ROOM COMPETITION

The COMPETITION saddle box is equipped with double doors for comfortable storage of up to three saddles, pads and blankets. Divided into two spaces, in a compartment with drawers and an extendable, wide rack for bridles, it allows you to store all the equipment for a multi-day competition or a tour. Despite its impressive size, it remains light and portable. Designed in collaboration with the best riders, it is ergonomic, capacious and durable. The best solution for riders who make no compromises and require full access to the necessary equipment.

DIMENSIONS:

Total height: 125 cm

Width: 125 cm

Depth: 62 cm

Wheels' diameter: 26 cm

Drawers' height:

bottom 30 cm (care products)

middle 2 x 19 cm (helmets, boots)

top 10 cm (personal items)

4 fully pull-out and detachable drawer (self-closing mechanism)

pull-out and detachable bridle rack in the central part of the box (self-closing mechanism)

practical net on the door for handy accessories

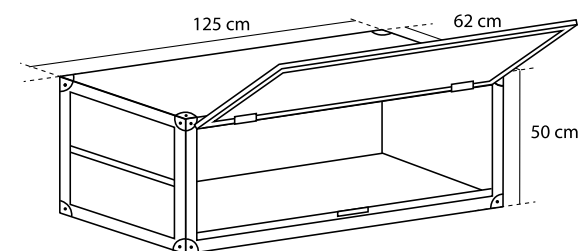

4 wide, inflatable pneumatic wheels, 26 cm in diameter. Two steering wheels with brake, two fixed (possibility of installing 4 steering wheels)

TACK ROOM EVO & EVO SLIM EXTENSION

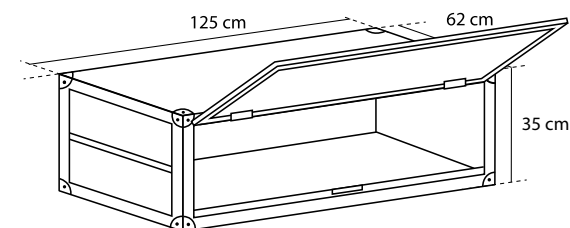

A complementary product expanding the offer. A single module that can be used as an independent storage chamber or to be combined with other saddle boxes. It has an adjustable door and hinges which allows to set the position of the flap according to the needs. EVO extension is easy to combine with other elements and it does not require any tool for its assembly and disassembly. The module can be mounted directly on the platform with wheels. EVO Slim extension with Competition saddle box meets requirements of air carriers.

DIMENSIONS:
Height: 50 cm
Width: 125 cm
Depth: 62 cm

EXTRA LIGHT
12 kg
ALUMINUM

**No tools needed to assembly
and disassembly**

DIMENSIONS:
Height: 35 cm
Width: 125 cm
Depth: 62 cm

adjustable door

vents in the chamber

hinges allowing any position of the
flap (opening angle 180 degrees)

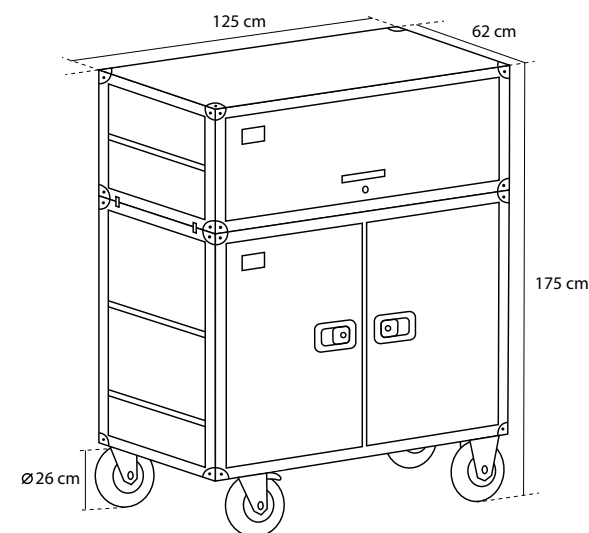

hooks for quick assembly
and disassembly of modules
(no tools required)

TACK ROOM COMPETITION EVO

Created by combining the COMPETITION saddle box and the extension. It combines the features of a two-piece and extremely packable COMPETITION saddle box, offering additional, modular space to be placed on the top of the saddle box. It does not require any tool for its assembly and disassembly. A perfect solution for riders interested in the storage of a large amount of equipment in one, organized space, such as rugs (for summer and winter season), saddle pads and accesories.

DIMENSIONS:

Total height: 175 cm

Width: 125 cm

Depth: 62 cm

Wheels' diameter: 26 cm

Drawers' height:

bottom 30 cm (care products)

middle 2 x 19 cm (helmets, boots)

top 10 cm (personal items)

4 fully pull-out and detachable drawers (self-closing mechanism)

pull-out and detachable bridle rack in the central part of the box (self-closing mechanism)

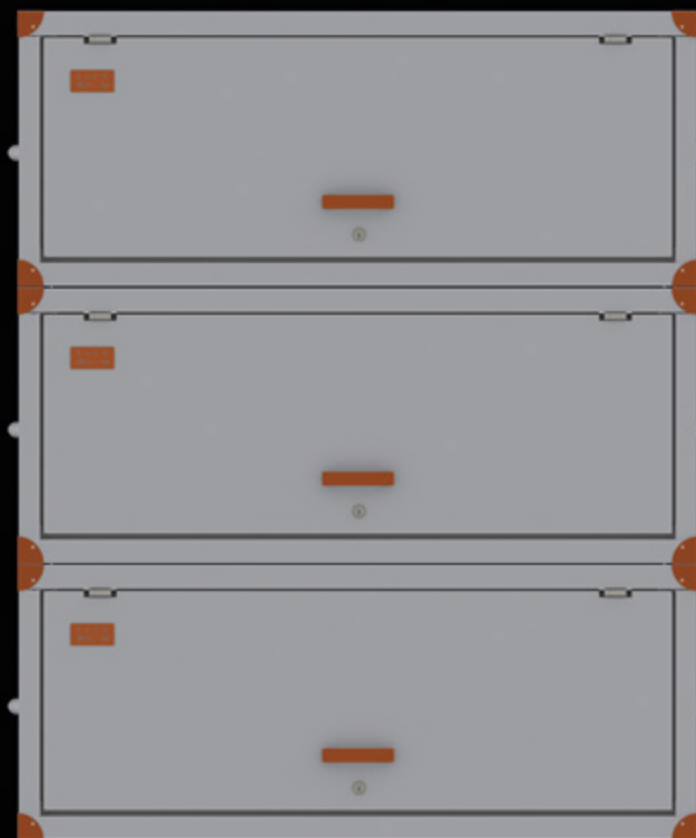

4 wide, inflatable pneumatic wheels, 26 cm in diameter. Two steering wheels with brake, two fixed (possibility of installing 4 steering wheels)

practical net on the door for handy accessories

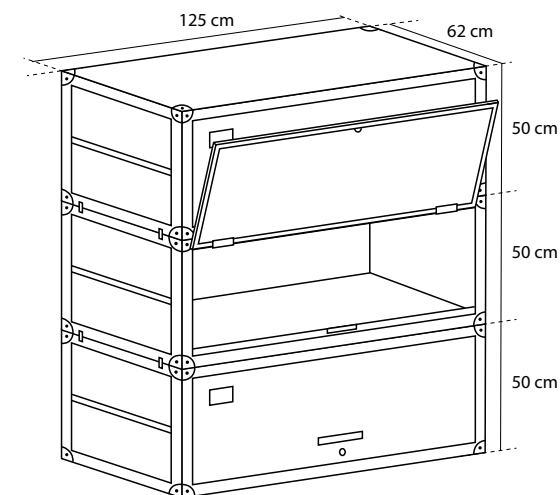

hooks for quick assembly and disassembly of extension (no tools required)

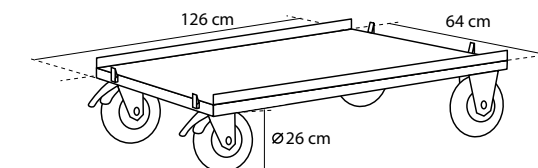

TACK ROOM EVOLUTION MULTI

A complementary product expanding the offer, constructed by joining together at least two, to any number of modules. Each of the modules has an adjustable door and hinges which allows you to freely set the position of the flap. It divides the storage space into several independently closed chambers.

This guarantees easy cleaning in individual sections, no diffusion of odors and obtaining a separate space for rugs, saddle pads and accessories. The possibility of transporting extensions on a platform with wheels.

A complementary product expanding the offer. An aluminium platform with 4 inflatable pneumatic wheels, 26 cm in diameter. Two steering wheels with brake, two fixed (possibility of installing 4 steering wheels). The platform can be used as a mobile base for configuration with EVO extensions. It is equipped with 4 hooks for quick assembly and disassembly. Does not require any additional tools.

adjustable door

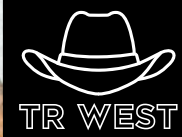

hinges allowing any position of the flap (opening angle 180 degrees)

vents in the chambers

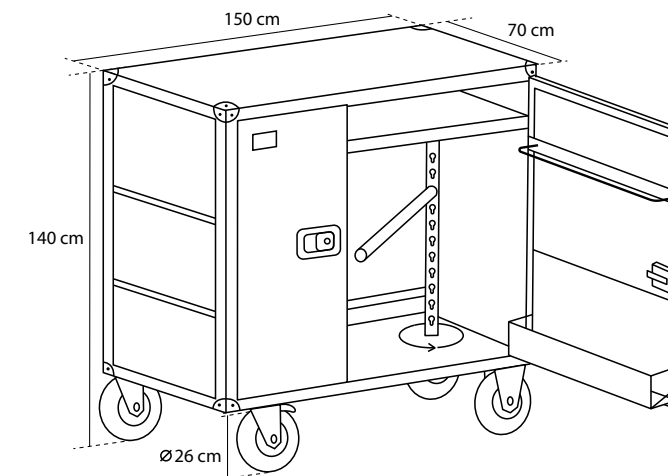

hooks for quick assembly and disassembly of extension (no tools required)

TACK ROOM WEST

A NEW PRODUCT FOR WESTERN LOVERS! Tailored for a western saddle, with a deep and wide interior and an innovative rotating arm, it makes it easy to store and remove even the largest saddles! A folding cabinet on the door provides additional storage space, easily accessible at any time. The stainless steel arm on the door is perfectly designed for hanging equipment while saddling or cleaning your horse. Four drawers in three sizes are our standard and proven solution. Plus a mirror to check the last details before starting! A hanger for halters, bridles and lassoes will help to deal with the disorder and tangles of equipment. Despite its size, the box is mobile thanks to large pneumatic wheels. Next to the wheels there is a firm and convenient winch handle, which does not exceed the outline of the box, thus not causing a danger.

DIMENSIONS:

Total height: 140 cm

Width: 150 cm

Depth: 70 cm

Wheels' diameter: 26 cm

Drawers' height:

bottom 30 cm (care products)

middle 2 x 19 cm (helmets, boots)

top 10 cm (personal items)

rotating arm makes it convenient to put in and take out the saddle

convenient handle for winch hidden under the saddle box

4 fully pull-out and detachable drawer (self-closing mechanism) and one to be spread on the door

4 wide, inflatable pneumatic wheels, 26 cm in diameter. Two steering wheels with brake, two fixed (possibility of installing 4 steering wheels)

TACK
ROOM[®]
Trailers

STANDARD EQUIPMENT CONSTRUCTION

- Scandinavian design
- Strong, hot-dip galvanized steel frame, additionally reinforced
- Axles and suspension supplied by the renowned Knott company
- Lightweight and durable roof made of polyester with 4-rib reinforcements
- Walls made of high-quality plywood covered with weather-resistant plastic
- Floor made of glass fiber reinforced composite sandwich panel
- Short drawbar for easy maneuvering
- Durable ramp covered with corrugated rubber
- Two gas cylinders to assist and facilitate the lifting of the ramp
- Opening rear top hatch
- Large side doors with secure oval corners
- Tinted windows with a grille inside
- Wheel arches with fenders
- Support wheel
- Streamlined shape of the trailer
- Foot on the ramp to look inside the trailer
- Two maneuvering handles on the front of the trailer
- 12 V/24V lighting system that complies with traffic regulations

TACK ROOM HAY CART

A great solution to make everyday work in the stables easier. Made of powder-coated steel in dark graphite as standard, it can be painted in any colour from our sample book. The platform rotates in both directions and the rotary motion can be locked with the platform brake. The cart itself rotates in place on one pneumatic, inflatable wheel with brake and two 26 cm in diameter wheels. The centre pin holds the bale upright until the hay is finished. The reflexions make the trolley highly visible and safe for use in the stable. The comfortable handle can be folded away after use.

one wide, inflatable pneumatic steering wheel with brake and two 26 cm in diameter wheels

folding comfortable handle

TACK ROOM SADDLE RACK

Four wheels, folding, steel Saddle Rack, with a modular platform, divided into four independent and fully removable chambers. The Saddle Rack does not require any tools for its assembly and disassembly thanks to the practical folding and unfolding system. The hanger is equipped with 4 to 12 reinforcements for saddles, saddle pads and rugs. Moreover, it includes 24 racks for bridles, helmets and small buckles. The racks are positioned along the horizontal railing allowing full use of space and easy access. The adjustable height of the side arms and movable distances between reinforcements, provides comfortable regulation, tailored to the needs. In order to protect against corrosion, it has been fully galvanized. It is possible to paint it in any color.

DIMENSIONS:
Height: 130 cm
Width: 120 cm
Depth: 79 cm
Wheels' diameter: 19 cm

ideal for sports stables and riding schools

individually selected number of reinforcements (max. 12 pieces)

4 chambers for utensils and accessories, removable by leather handles

4 wide, 19 cm diameter pneumatic wheels, all steering, 2 with brake
